QA & Testing Engineer

Responsibilities

Oglacs is looking for a young and dynamic tester to join its team.

Are you the smartest quality assurance (QA) tester on your team, but feel stuck running the same manual tests all day, every day? Are you eager to take the next step in your career and learn how to automate QA tests, but can't start because you don't have any software engineering experience? If this sounds like you, come and join us and learn exactly how our special automation approach allows you to dive headfirst into QA test automation from day 1.

At Oglacs, we do not pigeonhole our QA testers into a single product or a single test. Instead, we want you to have exposure to our entire portfolio and and apply your QA testing expertise to each of them.

Qualifications

- Bachelors Degree
- Manual QA testing experience.
- Strong attention to detail.
- Ability to work on multiple projects with strict deadlines.
- Strong written and oral communication.

Nice to have

- QA test automation skills.
